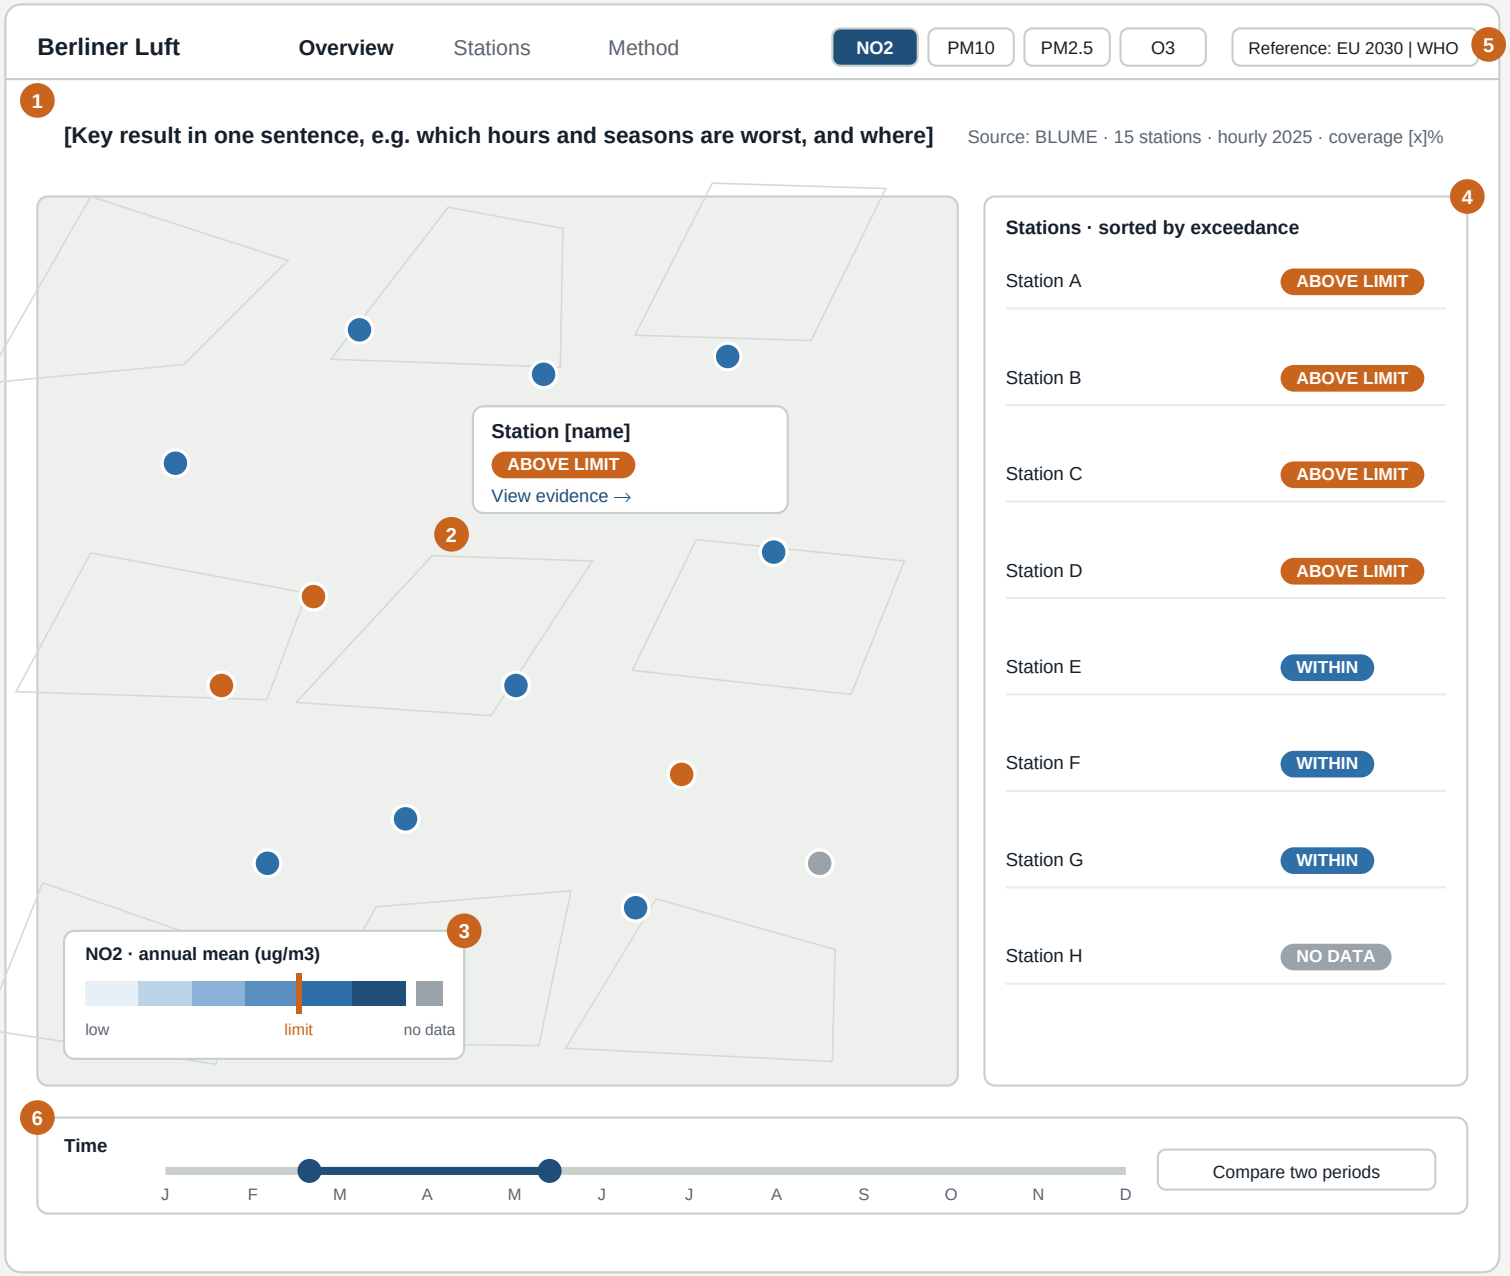
Screen 1 · Overview: where and when is the air worst?

Status first, evidence second. One key result before any chart.



1 Key result first
One sentence before any chart, with source and coverage.

2 Status first, evidence second
Station marker and popup show the status; 'View evidence' opens the series.

3 Univariate legend
Stepped scale, limit marker, no-data swatch, always labelled (Kontur proposal).

4 Station list
Sorted by exceedance, status chips, linked to the map on hover.

5 Pollutant and reference switch
NO2, PM10, PM2.5, O3 · EU 2030 or WHO, rule explained in one sentence.

6 Time slider and comparison
Scrub hourly 2025 data or compare two periods side by side.

Screen 2 · Stations: table and evidence

Dense table for comparison; detail drawer for evidence; every edge case has a visible state.

Berliner Luft Overview **Stations** Method

1

Station	Status	NO2	PM10	PM2.5	Trend	Cov.
Station A	ABOVE					[x]%
Station B	ABOVE					[x]%
Station C	ABOVE					[x]%
Station D	WITHIN					[x]%
Station E	WITHIN					[x]%
Station F	WITHIN	~				[x]%
Station G	WITHIN					[x]%
Station H	DELAYED					[x]%
Station I	WITHIN					[x]%
Station J	NO DATA	—	—	—		—

Cells show a colour step only in this draft; real values come from notebooks 01–04.

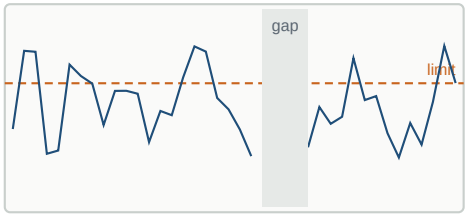
2

Station A

ABOVE LIMIT

Rule: annual mean above EU 2030 limit [x] ug/m3.

Source: BLUME · hourly 2025 · coverage [x]%



Time series with the gap shown, not filled

Daily pattern · seasonal pattern

1 Dense station table
Sortable by pollutant, status chips, sparkline trend, coverage per row.

2 Evidence drawer
Rule in one sentence, source and coverage, series with limit line.

Edge-case states 3

NO DATA	Sensor outage: dash, never zero
DELAYED	Late readings: last update shown
~ estimate	Estimated value marked inline
gap	Gap shaded in series, not filled

Refused question 4

"Does traffic cause this?" → the data shows the pattern, not the cause. Answer: what one year of measured concentrations can and cannot say.

Components (design system)

status chip · data table · legend · time slider · chart card · drawer · empty, loading, error states
